FULL STACK SOFTWARE DEVELOPER

Full stack software developer with a background in leadership, problem-solving, and team collaboration.
Committed to building intuitive, efficient software solutions that solve real problems and enhance user experience.

Languages: TypeScript, JavaScript, HTML, CSS, Dart
Tools/Frameworks: React, Next.js, Node.js, Express, MongoDB, PostgreSQL, Tailwind, Git, Flutter, VS Code, Cursor, Jira, AWS S3, Socket.io, OCR.space
Soft Skills: Team leadership, problem solving, analysis, adaptability, communication, creativity

EXPERIENCE

Software Engineer (Contract) *TheoTech (April 2026 - Present)*
- Built a ProPresenter integration delivering live multi-language slide translation to audience and projector screens, from a browser WebSocket connector through a server-side pipeline
- Added OCR for graphical slides with a tenant-scoped LRU cache, and managed S3 thumbnail delivery through a CDN
- Turned a subscriber request into whole-playlist translation, Planning Center plan import, and a single read-only link for translators
- Built a song translation memory that reuses reviewed translations across differing slide line breaks, including right-to-left languages
- Built PowerPoint and ProPresenter song import with duplicate detection and an optional AI cleanup step

Intern *Aypex (September - October 2025)*
- Learned and applied Flutter/Dart to support an AI-integrated athletics mobile application
- Coordinated with development team to address critical bugs and improved overall UI/UX
- Implemented frontend and backend for a new user-feedback feature
- Utilized Jira to manage tasks, track progress, and maintain efficient project workflow

Student - Full Stack Developer *Parsity (October 2024 - June 2025)*
- Immersive full stack development program with industry mentor-led guidance
- Increased proficiency in HTML, CSS, Bootstrap, Tailwind, JavaScript, React, Node.js, Express, MongoDB

Music Director *Various Churches – Washington, D.C. (2009 - Present)*
- Led volunteer teams of 40+ volunteers and professional musicians
- Coordinated weekly services and special events using industry-standard tools and software
- Built and nurtured creative communities of musicians, fostering both individual growth and collaborative excellence
- Managed group dynamics & disagreements while maintaining a cohesive and goal-oriented team culture

TECHNICAL PROJECTS

Citizen Sampler - Full stack musical web app for recording sample-based beats | Website | Github
- Built using React, Next.js, TypeScript, Node.js, Express, and Tone.js for interactive audio playback
- Designed responsive front end with Tailwind and managed sample playback and recording logic

Lightz - Desktop app for controlling DMX stage lighting hardware, built for live production use | Website | Github
- Built a cross-architecture macOS desktop app with Electron, React, and TypeScript, driving dual-universe DMX output
- Implemented scene recall with fade transitions, DCA-style fixture groups with real-time fader scaling, and Bitfocus Companion integration for external show-control triggering
- Packaged, versioned, and released the app with .dmg installers for Apple Silicon and Intel via versioned GitHub Releases

Git Story - AI-integrated web application for turning your git commit history into prose | Website | Github
- Built a React/Next.js frontend and Node/Express/PostgreSQL backend
- Integrated Google Gemini to summarize commits, group them into chapter-style narratives, and generate structured technical story outputs

Underscore Apps - Collection of single-purpose browser tools with a minimalist design philosophy | Website | Github
- Built with React 18, TypeScript, and Vite; custom CSS design system with dark/light theming
- Leveraged native browser APIs including Web Audio (tuner, metronome) and Canvas (drawing tool with IndexedDB persistence)
- Designed for open source contribution with an agent-optimized Claude Code slash command for contributors

EDUCATION

Certificate in Full Stack Development — *Parsity*
Master of Arts in Religion — *Reformed Theological Seminary, DC*
Bachelor of Arts in Economics and Religion, Summa Cum Laude — *University of Mary Washington*
